February 13, 2013

The 2013 iGaming North America conference marks the third year of this unique networking and educational event designed to introduce the land-based gaming businesses of North America to the global iGaming industry. As the industry's most trusted advisory firm, our aim is to provide a cost-effective educational and networking environment that helps foster understanding regarding the potential impacts of regulation of Internet gambling in the U.S. and Canada, and provide critical information about the players, resources, legislative framework and topics that are important to all segments of the industry. With the surge in activity at both the state/provincial as well as federal levels, the time is right for all of the operators, consultants, vendors and suppliers focused on the North American audience to come together for this important informational event.
