## **Fantasy Springs Resort Casino Selects Agilysys Materials Management System**

2/9/2007 1:36:39 PM

Agilysys, Inc., (NASDAQ: AGYS) a leading provider of enterprise computer solutions, including specifically designed hospitality industry solutions, announced Fantasy Springs Resort Casino selected its Materials Management System (MMS), an inventory and procurement solution, to streamline operations, reduce costs and enhance the hotel casino's financial controls.

Fantasy Springs is owned and operated by the Cabazon Band of Mission Indians. The 250-room Palm Springs hotel casino offers guests exciting Las Vegas-style gaming, world-class dining and entertainment, comprehensive conference facilities and access to a number of renowned golf courses.

"We needed a more sophisticated solution for managing vendor purchases and material inventories," said Joe Callahan, chief financial officer, Fantasy Springs Resort Casino. "The Agilysys solution will provide our management team access to more reliable and accurate information, which will help us negotiate better pricing and move the hotel casino closer to a 'just-in-time' inventory."

Callahan also said Fantasy Springs implemented additional MMS applications from Agilysys that are expected to provide cost-saving benefits in the short-term. Specifically, Fantasy Springs is using the innovative MMS Menu/Recipe Analysis Module. "The module allows automatic costing of recipes based on receipts enabling us to determine exactly which items show the highest return on investment," he said.

Fantasy Springs is also using the MMS Bar Coding Module, which seamlessly transmits data from handheld scanners to the resort's system. "This allows us to save on labor while reducing revenue loss from inventory errors and shrinkage," he said.

"We expect Fantasy Springs to quickly realize the benefits of MMS," said Tina Stehle, vice president and general manager, Agilysys Hospitality Solutions. "The property has invested in a comprehensive, fully integrated inventory and procurement solution that's proven itself in a

variety of venues from boutique hotels to 16 of the world's 20 largest hotels.”

#### About Agilysys, Inc.

Agilysys is a leading provider of enterprise computer technology solutions consisting of complex server and storage hardware, software and services. The company serves a broad base of customers in a wide variety of industries as well as the public sector. Agilysys designs and implements tailored solutions to help end users resolve their most complicated information technology (IT) needs, and supports reseller partners in growing their businesses. By combining proprietary software and services with the products and services of leading suppliers, Agilysys serves as a critical link in the IT supply chain. The company also offers industry-specific expertise in markets such as retail and hospitality. Headquartered in Boca Raton, Florida, Agilysys has sales offices throughout North America, and in the United Kingdom and China.
